

## ■ ■ ■ A Letter to Frustrated Parents of Children with Dyslexia

(Invest 3 minutes to discover a clear path to ending your search for solutions)

Dear Fellow Parent,

Does your child struggle with reading or learning?

Have you been told (or do you suspect) your child has dyslexia?

Most approaches to addressing dyslexia symptoms are *workarounds* – like putting bandages on gaping wounds that may stop some bleeding but don't address deeper issues.

If you have spent months (or years) seeking answers, you may be in for a pleasant surprise.

### ■ ■ ■ The Realities Behind “Dyslexia”

Dyslexia is a term that addresses a wide range of symptoms related to one's lack of ability to process spoken language and written words. If you read five definitions of “dyslexia” from five authoritative sources, you'll find variations between all of them. Dyslexia has, it seems, become somewhat of a catch-all for many speech and language processing challenges that are often manifested in a deficiency in reading, spelling, and writing.

Challenges with *visual information processing, auditory processing, speech/language development, and phonological awareness/processing* are commonly categorized as dyslexia.

When parents, teachers, and medical professionals have exhausted their resources trying to discover the solutions to struggling students' obstacles – and feel confused as to how to address “dyslexia” – *ACHIEVE Learning Sciences* provides insights that quickly **eliminate common misconceptions** and **illuminate core issues *and their solutions***.

Dyslexia, learning disabilities, and other related challenges usually stem from barriers in the sensory and processing systems needed for efficient reading and learning. Identifying the specific barriers that are keeping your child from reading, understanding, or performing academically to their full potential can demystify the “dyslexia” puzzle and provide solutions to help your child thrive in and beyond the classroom.

### ■ ■ ■ How These Realities Are Being Successfully Addressed

*ACHIEVE Learning Sciences* has developed a first-of-its-kind evaluation that addresses these realities in one in-depth analysis that identifies the neuro-functionality deficits behind the symptoms being experienced by children with reading and learning challenges. This integrated evaluation addresses:

- Phonological Processing (Decoding, Encoding, Phonemic Awareness),
- Speech/Language Development,
- Auditory Processing,
- Eye Tracking and Eye Teaming,
- Visual Information Processing, and
- Mental Health, Emotional, and Social Factors.

In just **90 short minutes**, this evaluation will reveal your child's processing challenges to our panel of doctors and other healthcare professionals. Our team will review the results of your child's evaluation in just two days, at which time you will meet one-on-one with a doctor to **review** the findings, **be given** specific recommendations and the appropriate referrals, and **receive a treatment plan** that addresses your child's specific needs in order of priority.

### Your Risk-Free, Money-Back Guarantee

We are so confident in our ability to uncover your child's core needs and direct you to the best solutions that we offer this **unconditional, money-back guarantee**: *You will discover the solutions and be connected with the providers your child needs to effectively address his/her core processing issues, or we will happily refund the fee for this evaluation.*

If finding real, sustainable solutions to your child's reading and learning challenges has been frustrating to you, *ACHIEVE Learning Sciences* may just have the answers you've been seeking. The solutions you'll find are backed by decades of research, clinical proof, and, most importantly, patient success. The only thing that is new is your opportunity to have an aligned, objective team evaluate your child's needs in one comprehensive approach that **rules out** perceived problems, **pinpoints** core issues, and **provides** a *unified treatment plan*.

To schedule your child's *Dyslexia & Processing Evaluation*, please call the patient care coordinators at ACHIEVE Family Vision at **801-492-6393**.\*

We look forward to helping you end your frustrating search for answers. *See you soon!*

Sincerely,

**The Doctors, Therapists, and Staff**  
of ACHIEVE Learning Sciences & Our Partner Providers
